About This Report

As the market in which Arista does business transforms, so do the expectations and standards of our customers, investors, employees, and communities in which we work. We are proud to present our third Corporate Responsibility Report which illustrates our ongoing progress as well as plans for continual improvement in our ESG performance. This report demonstrates our commitment to the Arista Way, signifying our intentions to increase transparency regarding our environmental, social and governance performance. We plan to continue producing annual CR updates moving forward.

This report has been prepared in accordance with the GRI Standards: Core Option, covering fiscal year 2021 (January 1 – December 31, 2021), with multi-year trend data provided where possible. The report’s scope includes all entities addressed in our financial statements and focuses on ESG topics relating to Arista’s business operations. For more information about our sustainability programs, please visit our sustainability webpage.

We value all stakeholder feedback and encourage you to engage with us. To learn more about this report or to enquire about our ESG performance, please email sustainability@arista.com.
"We remain committed to maintaining the highest level of professional and ethical standards in the conduct of our business around the world."

At Arista we have a set of core values we call the Arista Way. It is centered around one key principle: Always do the right thing for customers, employees and shareholders. As we enter the post-pandemic world, we will maintain our focus on reducing our carbon footprint while continuing to build cloud networks that further enable distributed workspaces around the world. We remain steadfast in our tenets, and I am proud to say that Arista has upheld these principles in the face of uncertainty and monumental change.

Business with Integrity
We remain committed to maintaining the highest level of professional and ethical standards in the conduct of our business around the world. Our cloud networking products, services and support are essential to the continued operation of critical infrastructure connecting people and businesses at a time when global communities are driven to physical isolation. We are committed to overcoming the challenges presented in a post-pandemic world to support the continued operation of our networks and their ability to handle increasing demand.

Minimizing Distraction
We are working proactively to minimize any disruptions and customer responsiveness remains our top priority. We have taken measures to reduce supply chain disruptions by leveraging our multiple locations and multiple supplier capability more dramatically and by authorizing an increase in inventory levels.

Culture & Community
The events of the world, be it pandemics, climate change or conflict and war have forced us to reflect on the gratitude for what we have, including our families, health and an opportunity to rethink our goals. We are focused on the welfare of our employees, customers and community. Core to our culture are these three goals:

1) Employee Health and Safety. Arista continues to take guidance at state and local levels regarding the return to offices around the world and continues to utilize the latest video conference technology to keep remote workers connected.

2) Communities in Crisis. When the war broke out in Ukraine, Arista took immediate steps consistent with recently implemented US Government and EU sanctions and guidelines. We also partnered with two of the world’s largest and most reputable aid agencies to drive and match much needed donations for humanitarian aid.

3) Serving the Community. The Arista Foundation took a leadership role in matching employee contributions early in the pandemic when food and blood shortages were taxing a system in crisis.

We are deeply grateful to our employees, partners, customers and shareholders who have supported us and navigated through this unsettling time together. We remain committed to you all.

Jayshree Ullal
PRESIDENT AND CEO
Arista’s Response to COVID-19

Keeping Arista Employees Safe During COVID

In 2021, Arista Networks continued our primary focus to support the health and safety of our employees given the numerous challenges of new COVID outbreaks and variants. Our efforts continued to be led by the Arista Executive COVID Task Force consisting of senior representatives from HR, Legal, IT, Facilities and Engineering, established at the beginning stages of the first outbreak in early 2020. Arista continues to be proud of our efforts as we have had zero employee deaths or known cases of spread at Arista facilities as of 12/31/2021.

Arista’s Rapid Response & Actions to the India COVID Crisis

At the first signs of increasing COVID cases in India in May 2021, Arista took rapid, decisive actions by creating a special India COVID Task Force consisting of senior leaders from Arista India and HQ HR and Facilities to respond to the crisis. The Task Force’s first critical priority was to locate, purchase and deploy oxygen concentrators, which resulted in having a major impact in saving several employee and immediate family member’s lives. Next, efforts were made to build relationships and partnerships with hospitals and medical groups to ensure access to hospital beds, if needed, as well as the ability for our employees across India to have access to vaccinations. Finally, a global Arista employee giving drive was launched to support India COVID disaster relief benefiting a number of charitable organizations including: American India Foundation, SEWA International-AIMS, Save Life Foundation, Give India, PM Cares and One More Breath. Combined Arista Foundation grants, employee donations and executive matching gifts totalled several hundreds of thousands of dollars.

Utilizing Arista Wireless/Access Point Technology for Contact Tracing

Arista’s COVID contact tracing efforts have continued to keep our employees and facilities safe by using our P-Tracer technology utilizing proximity data from Arista access points to accurately provide reports on contact tracing, when necessary.

Arista HQ Employee Benefit: On-Site COVID Vaccinations and Booster Shots

Driven by the enthusiasm and support of our CEO, Jayshree Ullal, Arista worked tirelessly with vaccination providers very early-on before vaccine availability to be one of the first Silicon Valley companies to provide drive-thru on-site COVID vaccinations as a benefit to our employees and family members at HQ in April 2021. Additionally, we also offered an on-site booster clinic in December 2021. Thanks in large part to these efforts, Arista has achieved very high vaccination rates across our entire employee base.

Moving Forward into 2022:

As the COVID pandemic hopefully progresses towards more of an endemic phase, Arista will focus our COVID Task Force efforts to increasing the number of our global employees returning to the office in newly developed hybrid work models.

Organizations Arista Employees Supported in 2021

- American Indian Foundation
- Give India
- HelpAge India
- One More Breath
- PM Cares
- Save Life Foundation
- SEWA International-AIMS
Arista Networks is an industry leader in data-driven, client to cloud networking for large data centers, campus, and routing environments. Arista’s award-winning platforms deliver availability, agility, automation, analytics, and security through CloudVision® and Arista EOS®, an advanced network operating system. 2021 Arista Corporate Responsibility Report | 5
Our Customers

Our customers include leading global technology companies in financials, web 2.0 and cloud/service providers, building public and private cloud computing systems. We build scalable datacenters for many Fortune 500 companies and deliver products worldwide through distribution partners, systems integrators and resellers with a strong dedication to partner and customer success.

Arista Networks is an industry leader in data-driven, client to cloud networking for large data center, campus and routing environments. Arista’s award-winning platforms redefine and deliver availability, agility, automation, analytics and security. At the core of Arista’s innovations is a single consistent software platform, the Arista EOS® network stack, and network data lake architecture (NetDL™) enabling high availability and unique application extensibility. We use leading merchant silicon to bring to market the most efficient, reliable and high performance platforms for today’s datacenter, cloud and campus environments. In 2021, Arista introduced a new zero trust security framework for integrating security policy with the network through Arista EOS® and CloudVision® capabilities. Arista also expanded 400G solutions for enterprise and cloud customers with the next generation of the 7050X and 7060X Series, providing performance and cost benefits for customers of all sizes as they transition to 400G networks.

‘We build scalable datacenters for many Fortune 500 companies and deliver products worldwide through distribution partners, system integrators and resellers with a strong dedication to partner and customer success.’

For more information on Arista’s financial performance, please visit our Investor Relations webpage to reference our latest SEC filings.
Determining Materiality
Our corporate responsibility report is an important opportunity for us to enhance our disclosure on key environmental, social, and governance (ESG) topics that our internal and external stakeholders deem significant. To assess which topics to include in this report, we undertook a high-level materiality exercise in 2022 to identify material ESG topics that represent a strategic priority for our business based on the significance of potential financial and reputation impacts. We may experience these impacts directly, for example by their operational impact to our buildings, employees, or suppliers, or indirectly due to the influence they have on our stakeholders and their assessments of our company.

Lower priority topics that we do not consider as material to our business but are still of interest to our stakeholders are also disclosed in our GRI Content Index. Our SEC filings and Annual Reports provide regular insights into our business and financial performance, and address material risks as defined by SEC whereby a reasonable shareholder would deem the risk important.

Approach & Results
Our analysis included a peer review process, evaluation of external stakeholder inputs, and an internal stakeholder feedback session to validate the list of material corporate responsibility topics. The assessment resulted in eleven broad themes for which we disclose our management approach and response within the narrative of this report.
We believe that the Information and Communications Technologies (ICT) industry can enable great improvements for the planet. And although we do not manufacture products in house, leading to most of our environmental impacts occurring in the value chain, we take environmental stewardship to heart and are working hard to minimize our direct footprint.

Environment

Environmental Management System

We’ve implemented an Environmental Management System (EMS) that lays out our objectives for achieving pollution prevention, environmental protection and monitoring, and continual improvements in the environmental performance of our operations. Backed by our Environmental Policy, the EMS provides a framework for monitoring of progress, internal employee training to embed sustainability into our business, external stakeholder engagement to promote continual learning of best practices, and setting measurable targets to drive performance.

And while we do not manufacture products in-house, we ensure that our five contract manufacturers’ facilities are ISO 14001 certified.

Efficient Offices

Our own efforts are grounded in a sustainable foundation for our operations. Two locations, our Santa Clara Headquarters and our San Francisco office are both LEED Gold certified. The certification, awarded by the US Green Building Council, is based on the properties’ use of sustainable materials, water and energy efficiency, indoor environmental quality, location and transportation and overall innovation. Our headquarters includes environmentally friendly features such as floor-to-ceiling windows that filter heat and maximize natural light, and energy efficient lighting, heating, cooling and ventilation. In addition, high-efficiency plumbing fixtures and landscape irrigation systems are installed to conserve water at a critical time for California. We also promote alternative commuting with onsite electric vehicle charging stations, priority parking for hybrid vehicles and bike lockers throughout the campus. Nearby light-rail and bus service is provided by the Santa Clara Valley Transportation Authority.

Our awareness of these foundational benefits means that we’re moving many of our international offices to newer, energy-efficient facilities. For example, we moved our Bangalore operations to a facility that was built according to LEED Gold Level rating benchmarks.
At Arista, we always look towards reducing our energy usage, including our operational needs. Our LEED facilities offer a baseline that already meets higher efficiency standards than the average, however we know we can’t stop there. As a young, growing company with a relatively small footprint, our initial efforts concentrated on growing our company while keeping our emissions intensity consistent, if not following a decreasing trend. In the meantime we’ve been gathering data to help inform new work, including at sites located outside of the US, to strengthen our efforts and set a course for future improvements. We’re proud of our successful start to our efforts: our carbon intensity by revenue has decreased over 50% since 2014.

Approach to Reduce Scope 3 Emissions
As we recognize that the emissions from our supply chain account for the majority of our overall emissions, we are taking significant steps to collect accurate data and set reduction targets for our Scope 3 emissions. As a first step to achieve this, we will be joining CDP’s Supply chain program in 2022 to collect emissions data from our suppliers. In the meantime, we will also be working on understanding the process and requirements to set SBTis. We will then review our supplier allocations provided through CDP and work towards developing targets and get approvals from SBTi. Our goal is to publish SBTis by Jan 2023 and in our CRR in 2023.

While our revenue has continued to grow, our carbon intensity has decreased each year since 2014.
Waste Management

Our offices do not generate large quantities of waste; however we follow the simple rule of using less, re-using where possible, and ensuring that the materials that we use in our operations and in our products are recyclable. We’re encouraged by the consistently low proportion of landfilled waste compared to total waste generated by our operations even as our data collection becomes more robust with the inclusion of more facilities. However, we see an opportunity to work harder to reduce the absolute amount of waste going to landfill.

We’re working hard to continually expand our recycling and reuse efforts. In 2021, we increased the amount of metal and packaging recycled by 33% and 34%, respectively. Meanwhile, our waste to landfill decreased by 40% from 2020.

We employ design for environment principles to ensure that our products are designed with the least amount of materials possible, while still meeting performance and reliability requirements. For our product packaging, we design in materials that adequately protect the product while optimizing the volume of the packaged product. In addition, through our design for environment program, our products and packaging are designed for easy disassembly and recycling.

For our products, we work with ISO-certified third-party recyclers to appropriately dispose of any e-waste generated by our operations.

In 2021, the amount of metal and packaging we recycled increased by 33% and 34%, respectively.

Product Design & Efficiency

We are committed to designing, manufacturing and delivering leading software-driven cloud networking solutions in an environmentally and socially sustainable manner. We aim to integrate sustainability in every aspect of our product’s life cycle, from the materials that make up our products, all the way to the end of life of the product.

Design for Environment

Our product design philosophy follows the principles of Design for Environment (DfE), which considers the environmental impact of the product at all stages, as early as possible in the design process. We focus on product material weight reduction, environmentally friendly material usage, energy efficiency, ease of recycling, options for reuse and refurbishing, and efficient packaging.

Product Energy Efficiency

The operation of our datacenter products can require a large amount of energy, so we work to continually improve energy efficiency of new products to save on energy and reduce greenhouse gas emissions during the product’s use phase. We have found that minimizing and upgrading components in product hardware design while simplifying the architecture can provide improved performance and throughput relative to power consumption.

Power Supply Efficiency

In electronic products, energy is lost through conversion and delivery of power to the product. Our new products use Platinum and Titanium efficiency power supplies, which reduces the total product power consumption and heat generated from the power supply. In FY16, 83% of our power supplies shipped to our customers were 80-Plus Platinum rated or better. In FY21, 98% of our power supplies shipped to our customers are rated Platinum or better.

Power Supplies rated 80-Plus Platinum or better

Since our first product, we have driven the power consumption to ~95% reduction.

For the cost, density and performance we were looking for, we could find no other solution that got close to the level of the Arista switches. The move to Arista has led to a 6 to 8 times increase in throughput with a latency reduction.”

Christian Marnitz
Head of Technology, Picturemaxx

Arista Product Power Consumption by Generation

"For the cost, density and performance we were looking for, we could find no other solution that got close to the level of the Arista switches. The move to Arista has led to a 6 to 8 times increase in throughput with a latency reduction.”

Christian Marnitz
Head of Technology, Picturemaxx

Since our first product, we have driven the power consumption to ~95% reduction.

---

For the cost, density and performance we were looking for, we could find no other solution that got close to the level of the Arista switches. The move to Arista has led to a 6 to 8 times increase in throughput with a latency reduction.”

Christian Marnitz
Head of Technology, Picturemaxx

Since our first product, we have driven the power consumption to ~95% reduction.
Product Stewardship

We strive to reduce the hazardous materials in our products without degrading product performance and reliability as well as comply with applicable product related environmental laws and legislations on the restriction of certain hazardous substances.

Environmental Compliance

Our product stewardship program oversees materials that are regulated through both global product environmental laws and regulations as well as customer requirements. We ensure that our suppliers comply with applicable environmental laws and regulations for the parts that they supply or manufacture for us. This includes, but is not limited to:

- EU Batteries Directive (EU Regulation 2006/66/EC)
- SCIP is the database for information on Substances of Concern In articles as such or in complex objects (Products) established under the Waste Framework Directive (WFD). Companies supplying articles containing substances of very high concern (SVHCs) on the Candidate List in a concentration above 0.1% weight by weight (w/w) on the EU market have to submit information on these articles to ECHA, as from 5 January 2021.

Compliance with these regulations has been verified using internal design controls, supplier declarations, and/or test data in accordance with clause 4.3 of standard EN50581:2012, which includes internal design controls, data from supplier declarations and/or material disclosures. Arista Networks possesses the technical documentation relating to this declaration of compliance.

Takeback & Recycle

As a producer of hardware products, Arista offers a takeback and recycle program in our US and European markets, which allows our customers to return end of life products. Our recycling partners use facilities that adhere to the international environmental standard ISO 14001 ensuring returned products are disposed of in an environmentally safe manner. Please refer to the table on page 10 for the quantity of material returned.

Arista has been able to successfully reduce the use of Carbon Black ink by 80% in its packaging parts, and targets to complete 100% by the end of 2022.

Packaging at Arista starts with recycled materials and ends with recyclable materials. Even with this close attention to recyclability, we’re also working to move up the waste hierarchy by exploring opportunities for reuse. By including product packaging in the product development cycle, we have effectively optimized the package/product relationship, thereby finding the most efficient and sustainable method for product protection.

The majority of our products currently ship in corrugated board which contain post-consumer content and the high density polyethylene end caps which protect our products in the box are 100% post-consumer recycled. These packages are designed to optimize the size of the cube, reducing material and energy consumption in manufacturing while lowering the amount of energy required in delivering each product through dimensional weight reduction.

Principles of Sustainable Packaging

- Work cross-functionally to ensure that the most cost effective and environmentally sustainable solution is reached in the product/package relationship.
- Design in materials that adequately protect the product while optimizing the volume of material and utilizing recycled goods.
- Reduce cube size, directly impacting material usage and reducing the amount of energy expended in transportation.
- Design utilizing recyclable and reusable materials, implementing tools for reclamation of reusable packaging.
- Arista has been able to successfully reduce the use of Carbon Black ink by 80% in its packaging parts, and targets to complete 100% by the end of 2022.
Arista celebrates our employees—we strive to differentiate by supporting a fun and inclusive culture that supports every member of our team. We’re extremely proud of our recognition as a US and India certified Great Place to Work as well as our recent achievement and our best-in-class ratings on Glassdoor, and Comparably based on feedback and survey input from our current employees. Social impacts aren’t limited, however, only to the locations in which we work every day; our responsible supply chain efforts are a testament to our commitment to the communities we work in and support.
Community Engagement

Arista’s Rich Legacy and Culture of Giving

Community engagement and partnership is a core Arista value. We believe that fostering our relationship with the locales in which we work and serve creates a greater sense of belonging and satisfaction for our employees, enhancing our reputation as an employer of choice and exemplifying model corporate citizenship.

Through its charitable foundation, Arista gives generously to numerous deserving non-profit organizations dedicated to developing impactful solutions to hunger, environmental sustainability issues, children’s education, health and wellness with special emphasis on those in underserved groups as well as humanitarian disaster relief.

2021 Update—Arista’s Record Setting Year in Philanthropy!!

In 2018, Arista launched our Global Community Engagement Planning & Strategy, supported by additional resources to facilitate the work. In 2019, we initiated the idea of an end of year hunger fundraiser at our Santa Clara HQ office and raised over $80,000. In 2020, we expanded on our idea and success and launched our first ever simultaneous global giving event for hunger, raising funds to provide over 1.1 million meals globally to those in desperate need. In 2021, thanks to the amazing generosity of our employees and generous matching support from the Arista Foundation, we made aggregate donations and grants providing over 1.7 million meals, globally, well above our goal of 1.3 million meals, an increase of over 60%. For the second consecutive year, we are proud to be recognized by the Central Texas Food Bank as the #1 per capita fundraiser for their 2021 Corporate Challenge!

Additionally in 2021, the Arista Foundation provided generous grants to the Red Cross, SEWA International, New Hampshire Food Bank, Roswell Park Hospital, Children Discovery Museum, RISE Against Hunger and internationally, to the Peter McVerry Trust, Greater Vancouver Food Bank, Canadian Red Cross, MidWest Simon and PM Cares among many others. 2021 was our largest year in terms of number of grants and total $’s; a greater than 800% increase over 2020.

Arista Giving Extends to Products, Services and includes Employee Engagement Activities

In 2021, Arista made generous Arista equipment donations to Community in Schools, Washington (CISWA) as well as Santa Clara University to support primary, secondary, and higher education to develop our next generation of technologists and leaders.

Arista’s culture of giving extends beyond just monetary and equipment donations. In support of our communities, Arista has offered free pro-bono services to hospitals when threatened by ransomware attacks. As shared by our executive, Rahul Kalayas, "It is vital that IT and security professionals protecting healthcare networks are not distracted by attacks, especially during the COVID-19 pandemic. We feel strongly that it is our moral duty to ensure the security of the infrastructure they protect.”
Arista additionally hosted multiple virtual employee engagement/volunteer events throughout the year: including assembling 200+ teaching kits for Resource Area for Teaching (RAFT); career mentoring for underserved Bay Area youth with New Door Ventures and acting as reading mentors for underserved youth with Including You.

In 2022, Arista will be increasing our giving as well as our efforts to develop metrics to measure the impact of our giving. We are proud to be one of the first companies to launch and complete a global employee drive for Ukrainian refugees through the International Red Cross and UN that raised over $150,000 in aid.

In 2022, Arista will be increasing our giving as well as our efforts to develop metrics to measure the impact of our giving.

Arista is extremely proud of our continuing multi-year partnership with Second Harvest of Silicon Valley which provides food to those underserved and in need in the Silicon Valley. In 2021, Arista executives supported Second Harvest by taking time out to create public service announcements (PSAs) and were recognized at a special presentation for providing over 500,000 meals.
In late 2018, after driving through a deforested, stark, and barren area near his hometown of Pune, India, Arista Executive Pravin Bhagwat was inspired to launch an ambitious, life-changing initiative to return the area to its previously lush, green history.

**Planting a Tree for Every Arista Employee in support of 2021 Earth Day—Restoring the Earth**

Since that momentous day, through Pravin’s tireless energy and enthusiasm and in partnership with the non-profit 14 Trees Foundation, Arista has sponsored the planting of over 10,000 trees. For 2021, in recognition of Earth Day 2021 and support of the theme of Restoring the Earth, Arista sponsored the planting of one tree in the name of every single global employee (3500 trees).

**Continuing Efforts to Support Global Climate Action, Reforestation and Carbon Neutrality Efforts**

In support of the UN Sustainable Development Goal of Climate Action, the Arista Foundation continues to make generous grants to support non-profits such as ForestPlanet in reforestation and current tree-planting activities in the Irente Planting site in the Western Usambara Mountains region of northeast Tanzania. In 2022, Arista has made a grant to support the planting of more than 22,000 trees.

We invite you to view our Arista Tree Initiative Journey in partnership with the 14 Trees Foundation at the following [YouTube link](#).
Employee Wellness, Culture, & Training

In support and recognition of our truly dedicated employees, Arista proudly provides competitive and comprehensive benefit packages that give our employees the ability to optimize decisions for themselves, their families, and lifestyles.

In 2021, Arista continued to offer a broad variety of physical and mental wellness offerings to support our global employees in a virtual as well as an on-demand format. The intent was to provide practical wellness takeaways, strategies for stress reduction, and a regular program of informative webinars. Arista’s wellness pillars of focus were physical well-being, nutrition, mental well-being, social engagement and holistic health.

2021 Offerings Included:

• Monthly virtual webinars by medical and mental health wellness experts as well as continuing webinars led by medical professionals detailing the current state of COVID-19 across the globe, and recommended do’s and don’ts.
• Monthly virtual fitness classes and quarterly virtual wellness weeks customized for our Americas, EMEA and APAC by region, which continued to receive extremely positive feedback from the employee base and 3000+ employee-hours of total attendance.
• Toolkits accessible via intranet listing and including COVID-19 resources and work from home best practices.
• Drive through COVID, Booster and flu shot clinics for HQ employees.
• Two in-house fitness challenges with high global employee participation:
  – The Get Strong /41 Day Challenge — 364 enrolled global employees who cumulatively completed 5,427 miles,
  – Battle of the Bulge/Charity Challenge — 135 enrolled global employees who completed over 19 million steps and 4,000 workouts sessions of at least 30 minutes.

Workplace Safety
Arista closely monitors workplace safety and has maintained an extremely low global incident rate with no reported deaths in our entire corporate history. We continuously monitor and work to reduce and eliminate potential workplace hazards.

Over 5% of Arista’s global employee base enrolled and completed over 19 million steps and 4,000 workouts sessions of at least 30 minutes.

In 2022, we plan on adding additional mental health and caregiver support benefits for our US employees.

Ken Duda
CHIEF TECHNOLOGY OFFICER

Through years of programming and selling software, I discovered the only thing better than writing software myself is writing with a whole team of passionate engineers, because you can achieve so much more with a great team. From the earliest days at Arista, I’ve led the recruiting and hiring process, focusing us on the kind of person who really appreciates software — not just the designing, but also making it really work, delivering it to the customer, and sharing joy in the customer’s success. When we interview students from the world’s leading universities, or technologists from other companies, we determine if this person really cares about creating software, engages deeply with the problem at hand, and finds satisfaction in delivering something that really works. If so, they’re going to be a good fit for our team.

Using this process, we’ve built a team of over 1,000 software engineers globally, staying true to the vision of creating great software. I think the results speak for themselves.
Comprehensive Employee Benefits

Arista offers a comprehensive and competitive benefits package to all our global employees. Our global employees are offered the ability to participate in an employee stock purchase plan (ESPP) where legally permissible.

Arista Employee Training Update

In 2021, all Arista global employees continued to participate in annual training with regards to Arista Code of Conduct, Anticorruption Compliance Policy and Insider Trading Policy as well as critical mandatory Arista Data Protection and Data Privacy training. Our Data Protection and Data Privacy training covers topics such as data protection, classification and privacy, cybersecurity as well as prevention of phishing.

In addition, we asked all Arista managers in support of the challenge of mental health of their team members, to attend special training on Mental Health Fundamentals and we continued to update and evolve our training on Arista COVID-19 protocols. One of our highlights, globally, was to launch new training on ergonomics to our Ireland team members. 2021 total employee training hours were in excess of 7500+ hours.

Looking ahead for 2022, our goals include launching new employee training on Unconscious Bias and updated Sexual Harassment of Women at Workplace (PoSH) in India.

Employee Engagement and Surveys

At Arista, we strongly believe that by listening to our team members and maximizing opportunities for feedback, we can maximize their employee experience. A critical vehicle in measuring our success is through regular global employee engagement surveys with accredited external partners. In 2021, Arista partnered with Great Place To Work India to conduct a survey which resulted in Arista proudly being certified as a Great Place To Work. In 2022, Arista was just recently recognized as a Best Place to Work in the Bay Area.

In 2021, Arista was certified as a Great Place to Work in the United States and India.
Diversity & Inclusion

It Starts with Our Vision and the Top

Arista is all about respect, integrity, innovation, passion, pride and trust. We strive to build an inclusive culture that encourages, supports and celebrates the diverse voices of our employees. It fuels our innovation and connects us closer to the customers and communities we serve.

We continue to be proud to be one of a very select few Fortune 1000 companies currently with a female CEO and CFO.

Enthusiastic Employee Feedback

At Arista, we believe that the voices of our employees are the ultimate barometer in evaluating the success of our Diversity and Inclusion efforts. In recently completed employee surveys, Arista received our highest scores (very high 90% percentile) from all demographic groups in the areas of fairness. Per Great Place To Work, our scores were higher than the average of the top 100 overall performing companies in the US!

In addition, we are proud that as of 12/31/21, Arista held an A+ in Diversity on Comparably and a superior Glassdoor Diversity and Inclusion score of 4.2 from our employees.

What’s New in 2021: Increased Focus and Governance

In 2021, in recognition of the growing importance of developing, retaining, and promoting a diverse population of employees given an increasingly competitive global talent market, Arista established a Diversity Council including our most senior leaders in Global HR, Finance, Legal to develop Arista’s DEI strategy, set priorities and continually review and improving our metrics.

Arista Initiatives to Develop a More Diverse Pipeline

Recruiting: In 2021, Arista’s recruiting efforts continued to extend to diverse underrepresented groups via websites such as the National Society of Black Engineers, United Latino Job Bank and Hire Veterans as well as through diversity focused career fairs such as City Career Fair’s Annual Diversity Employment Day. For 2022, we plan on adding an additional non-profit partnership focusing primarily on female parents/caregivers returning to the workforce.

In 2021, 39% of Arista Interns were either female or from underrepresented groups.

In 2021, 39% of Arista Interns were either female or from underrepresented groups.

INTERN SPOTLIGHT

Umar Balogun Mohammed

I had a really great experience interning with Arista Networks in Summer 2021. As part of their internship program, I was provided with a mentor that was extremely helpful with getting me up to speed with Arista’s codebase and directing me to useful resources. My team was super supportive of me and helpful in understanding the projects I undertook. Working with them, I didn’t feel like an intern that would just be there for a little bit; they made me feel like a part of the team, ensuring I had a say in the matters we discussed and the decisions we made. Despite working remotely, there were also social events with the team to connect us as a unit, as well as events with other interns. In addition, I appreciate Arista’s commitment to diversity within their workforce as evidenced by their partnership with Code2040.
Employee Resource Group Highlight—Women@Arista

At Arista, improving the Arista experience of our employees through the support and development of their careers via employee resource groups is an important priority. Arista is extremely proud and supportive of the continuing efforts of our Women@Arista ERG as they held numerous events and meetings throughout 2021, including hosting speakers on breaking unconscious bias in feedback and annual performance reviews as well as partnering with IT in improving our careers website experience, providing mentorship, and developing new unconscious bias training.

Arista Investments in Underrepresented Group Education

Investing in increasing education opportunities for those groups underrepresented in the tech industry is a key priority and pillar of our Arista Philanthropy strategy. In 2021, Arista initiated the Samiha Mourad Fellowship program in partnership with Santa Clara University to support a select number of undergraduate and graduate BIPOC (Black/Indigenous/People of Color), female, and first-generation electrical and computer engineering students. Additionally, the Arista Foundation contributed generous grants to Resource Area For Teachers (RAFT); Friends of the Children, New York; and Community in Schools, Washington (CISWA) for primary and/or secondary underserved STEM educational support.

2021 Arista DEI Metrics Summary

In 2021, despite the challenges of a tightening global job market and a highly technical skewed employee population, Arista was able to increase our women and underrepresented ethnic and racial group employee population percentages from 2020 to 2021. We are, however, very early on our journey to longer-term DEI success and as previously mentioned, launching a number of initiatives in 2022 to serve as catalysts to further accelerate progress.

Globally, Arista’s Finance, HR, Legal and Marketing organizations were 64% female.

Diversity and Anti-Discrimination Policy

Our Code of Ethics and Business Conduct formalizes our diversity policy and affirmation of the principle of equal employment opportunity. Arista affirms the principle of equal employment opportunity without regard to any protected characteristic, including color, gender, age, disability, pregnancy, marital status, military status, or sexual orientation. This principle of freedom from discrimination applies to all aspects of the employment relationship.
Supply Chain

Manufacturing our products creates environmental and social impacts that extend far beyond the walls of Arista. We engage with suppliers throughout our global supply chain to manage and improve these impacts to conserve resources, save costs, and promote ethical social practices.

Supply Chain Policy

Just as we have stringent requirements for our own employees, partners and contractors, we’ve also established requirements for our suppliers.

Our Supply Chain Sustainability Expectations Policy initially sets forth the requirement to align with industry expectations. As a member of the Responsible Business Alliance (formerly the Electronic Industry Citizenship Coalition), or RBA, we support the RBA’s vision and mission, which strives to develop a global electronics industry supply chain that consistently operates with social, environmental and economic responsibility through a common RBA Code of Conduct. This code addresses topics including labor, health and safety, environmental, ethics, and management systems, referencing international norms and standards including the Universal Declaration of Human Rights, ILO International Labor Standards, OECD Guidelines for Multinational Enterprises, and ISO and SA standards.

We have used the RBA Code of Conduct to standardize best practices on social, environmental and ethical responsibility in our supply chain. Just as we are working to align our own operations with the RBA Code of Conduct to ensure human rights are protected, we encourage our own first-tier suppliers to do the same.

Supply Chain Responsibility

Environmental sustainability and social responsibility are important for Arista’s products and supply chain. In order for us to continually improve the impacts in our supply chain and meet our customers’ expectations, we request data on areas such as:

- Greenhouse gas emissions
- Energy use
- Water use
- Waste Management
- Labor
- Health and Safety

We utilize industry standard data collection techniques to minimize our suppliers’ work in providing data. In addition, we request that our suppliers report energy, greenhouse gas, water and waste data via the RBA On tool. Training is available in these areas as they arise.

Facilitated by our alignment with the RBA Code of Conduct, which addresses freely chosen employment, child labor, discrimination, health and safety, harsh or inhumane treatment, minimum wages, and working hours, Arista takes the following steps to validate the absence of slavery, human trafficking and forced labor in our supply chain and therefore ensure compliance with the California Transparency in Supply Chains Act (SB657) and the UK Modern Slavery Act:

- The “Freely Chosen Labor” section of the RBA Code of Conduct prohibits forced, bonded, or indentured labor; involuntary prison labor; and slavery or trafficking of persons.
- Supplier Risk Assessments – We perform supplier risk assessments of our suppliers via the RBA’s self-assessment questionnaires and will determine if any action is required.
- Supplier Agreements – Our suppliers are encouraged to adhere to the RBA Code of Conduct.
Supply Chain (continued)

CALIFORNIA TRANSPARENCY SUPPLY CHAINS ACT (SB657)
The California Transparency in Supply Chains Act (SB657) was signed into law in October 2010 and went into effect in January 2012. SB657 requires that certain companies doing business in California and have annual worldwide revenue exceeding one hundred million dollars to disclose on their specific actions to eradicate slavery and human trafficking in their supply chains.

HUMAN RIGHTS DUE DILIGENCE
We are aware of the situation and in China and concerned about reports of human rights abuses against the Uighur Muslims in Xinjiang.

We want to ensure human rights are protected within our supply chain and are working with our direct suppliers to exclude components manufactured from this region from our products. Our initial due diligence suggests that while no components of our products are sourced from or manufactured in Xinjiang, some suppliers may provide these materials to other customers. We will continue a program of work, investigation and vigilance in this area.

UK MODERN SLAVERY ACT OF 2015
The UK Modern Slavery Act 2015 became law in the UK in 2015. The Act consolidates previous UK legislation tackling slavery, child labor, and human trafficking offenses, and requires that organizations make public the steps they are taking to ensure that modern slavery offenses are not taking place in either their business, or their supply chain.

AUSTRALIAN MODERN SLAVERY ACT OF 2018
The Australian Modern Slavery Act of 2018 requires entities based, or operating, in Australia, which have an annual consolidated revenue of more than $100 million, to report annually on the risks of modern slavery in their operations and supply chains, and actions to address those risks. Other entities based, or operating, in Australia may report voluntarily.

CONFLICT MINERALS
Four valuable minerals that have been known to fund conflict in the Democratic Republic of Congo— are also a priority for us. We’re a member of the Responsible Minerals Initiative (RMI) and have management systems in place to ensure that the components of our products are sourced responsibly. We collect conflict minerals data from all our suppliers and file Form SD every year. Due diligence is performed on all of our suppliers, and we work with our suppliers to remove the high risk smelters from their supply chain. To learn more, please see our Conflict minerals policy.

COBALT REPORTING TEMPLATE
We will start collecting data on Cobalt in our supply chain in accordance with the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, in 2022.

Accounting for more than 90% of our annual spend, we engage with our Tier 1 suppliers on an annual basis to validate compliance to a wide range of Human Rights centered regulations. Based on our 2021 survey, 100% of our Tier 1 suppliers either adhere to RBA code of conduct or have a similar code of conduct in place that assists in maintaining compliance to human rights regulations in our supply chain.
We believe that good governance leads to high board effectiveness, promotes the long-term interests of our shareholders, strengthens the accountability of the board of directors and management, and improves our standing as a trusted member of the communities we serve. High standards and rigorous policies ensure that Arista’s activities undertaken to pursue our objectives are aligned with responsible conduct and ethics. Our Board of Directors are the gatekeepers of these standards, providing accountability, objectivity, perspective, and judgment when monitoring performance, in addition to standard duties such as providing oversight in the formation of the long term strategic, financial and organizational goals of the Company and of the plans designed to achieve those goals.

Board of Directors Highlights

Our Board of Directors are the gatekeepers of these standards, providing accountability, objectivity, perspective, and judgment when monitoring performance.
Board Governance

Our board is comprised of 9 industry veterans with extensive experience in the technology sector, including seven independent members, our CEO Jayshree Ullal and Founder, Chief Development Officer and Chairman Andreas Bechtolsheim. This technical expertise has been vital in steering the growth of our company. We believe that diversity with respect to tenure is important in order to provide for both fresh perspectives and deep experience and knowledge of the Company. Our nominating and corporate governance committee considers diversity and a broad range of backgrounds and experiences in making determinations regarding nominations of directors.

Ownership & Business Practice

Our stock ownership guidelines are designed to encourage our directors and chief executive officer to achieve and maintain a meaningful equity stock in Arista and more closely align their interests with those of our shareholders. Our chief executive officer should accumulate and hold an investment level in our common stock of at least three times annual base salary, and for our directors, it is three times the annual base retainer.

Audit Committee

Audit committee members satisfy the independence criteria set forth in Rule 10A-3 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and the listing standards of the New York Stock Exchange. In addition, compensation committee members also satisfy the independence criteria set forth under the listing standards of the New York Stock Exchange and SEC rules and regulations.
Board of Directors & Corporate Governance
The chart below illustrates the responsibilities of our board and board committees in overseeing risk in our operations.

**BOARD OF DIRECTORS**
- Meets with CEO and other members of the senior management team at quarterly meetings of our board of directors where they discuss strategy and risks facing the Company.
- Confirms that the risk management processes designed and implemented by management are appropriate and functioning as designed.
- Reviews strategic and operational risk in the context of reports from the management team, receives reports on all significant committee activities at each regular meeting, evaluates the risks inherent in significant transactions, and provides guidance to management.
- Assists in the areas of internal control over financial reporting and disclosure controls and procedures, legal and regulatory compliance.
- Discusses with management and the independent auditor guidelines and policies with respect to risk assessment and risk management.
- Reviews our major financial risk exposures and the steps management has taken to monitor and control these exposures.
- Monitors certain key risks on a regular basis throughout the fiscal year, such as cybersecurity risk and risk associated with internal control over financial reporting and liquidity risk.
- Reviews the adequacy and monitoring of our compliance programs for legal, ethical and regulatory requirements.
- Reviews our risk management policies, including our investment policies.
- Reviews management reports on internal compliance policies and procedures.
- Reviews and discusses with management our policies and practices relating to environmental and social responsibility matters.
- Reviews and discusses with management our information security policies and internal controls regarding information security.
- Manages risks associated with board organization, membership and structure, corporate governance and succession planning.
- Reviews any conflicts of interest.
- Assesses risks created by the incentives inherent in our compensation policies.
- Evaluates compensation policies and practices that could mitigate risks.

**AUDIT COMMITTEE**
- Assists in the areas of internal control over financial reporting and disclosure controls and procedures, legal and regulatory compliance.
- Discusses with management and the independent auditor guidelines and policies with respect to risk assessment and risk management.
- Reviews our major financial risk exposures and the steps management has taken to monitor and control these exposures.
- Monitors certain key risks on a regular basis throughout the fiscal year, such as cybersecurity risk and risk associated with internal control over financial reporting and liquidity risk.
- Reviews the adequacy and monitoring of our compliance programs for legal, ethical and regulatory requirements.
- Reviews our risk management policies, including our investment policies.
- Reviews management reports on internal compliance policies and procedures.
- Reviews and discusses with management our policies and practices relating to environmental and social responsibility matters.
- Reviews and discusses with management our information security policies and internal controls regarding information security.

**NOMINATING AND CORPORATE GOVERNANCE COMMITTEE**
- Manages risks associated with board organization, membership and structure, corporate governance and succession planning.
- Reviews any conflicts of interest.

**COMPENSATION COMMITTEE**
- Assesses risks created by the incentives inherent in our compensation policies.
- Evaluates compensation policies and practices that could mitigate risks.

**Risk Management**
Risk is inherent with every business, and we face a number of risks, including strategic, financial, business and operational, legal and compliance, and reputational. We have designed and implemented processes to manage risk in our operations. Management is responsible for the day-to-day management of risks the Company faces while our board of directors has responsibility for the oversight of risk management. Our board committees assist our board of directors in fulfilling its oversight responsibilities in certain areas of risk.
We are committed to maintaining the highest level of professional and ethical standards in the conduct of our business around the world. Our reputation for honesty, integrity, and fair dealing is an important component of our success and the personal satisfaction of our employees. Ethical behavior is the cornerstone to a company’s well-earned success. We’ve set policies and procedures in place to ensure that our operations, employees, and suppliers are held to rigorous standards regarding their conduct and compliance with expectations and regulations.

CODE OF CONDUCT
Our Code of Ethics and Business Conduct defines these standards, providing a roadmap for behavior that aligns with our company’s values and the Arista Way and our Code of Ethics and Business Conduct is reviewed annually. Per the Code, employees are prohibited from receiving, offering, promising, authorizing, directing, or making any bribes, kickbacks, or payments of money or anything of value to obtain an improper business or any other advantage for Arista. We also strictly prohibit giving money or anything of value directly or indirectly to a government official for the purpose of corruptly influencing a foreign government. To underline compliance with these requirements, employees participate in annual training on Arista’s Anti-Corruption Compliance Policy and Code of Ethics and Business Conduct.

ANTI-CORRUPTION
We are committed to complying with applicable international and domestic anti-corruption laws, including the U.S. Foreign Corrupt Practices Act (“FCPA”) and the U.K. Bribery Act. Our Anti-Corruption Compliance Policy and Guidelines outline the parameters of what is acceptable and what is not permissible from an anti-corruption point of view. Companies like Arista can be held liable for the bribery acts of third parties, including commercial intermediaries and other agent representatives and joint venture partners. To ward against these activities, we have established procedures for conducting due diligence on channel partners engaging in international sales, and manufacturers, suppliers, logistics providers, customs agents and other third parties that may be directly or indirectly interacting with foreign officials on our behalf.

WHISTLEBLOWER POLICY
Our Whistleblower Policy encourages transparency, facilitates confidentiality, ensures appropriate handling of complaints, and provides multiple avenues for employees and non-employees alike to submit concerns around accounting or auditing matters via our whistleblower website (www.arista.ethicspoint.com), and our ethical/violation hotline (telephone numbers available at www.arista.ethicspoint.com). As of this report’s publication, there are no pending litigation matters alleging anti-competitive behavior or antitrust violations by Arista.
Arista is proud of our progress and accomplishments achieved in 2020 but as consistent with Arista culture, but we continually aspire for even greater levels of corporate responsibility success and achievement.

## Corporate Responsibility Goals

### 2021 - 2022 Goal Progress Report

<table>
<thead>
<tr>
<th>GOAL</th>
<th>STATUS</th>
<th>ASPECTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Continuation and Multi-Year Plan for Arista’s Tree Planting Initiative in India</td>
<td>COMPLETE</td>
<td>In 2021, Arista planted more than a tree in the name for every Arista employee (3500 trees) in support of the UN’s World Environment Day. As a longer term plan, we are aligning our tree planting efforts with are goals for carbon neutrality.</td>
</tr>
<tr>
<td>Supply Chain Partner Alignment with CDP and Arista’s ESG Efforts</td>
<td>ONGOING</td>
<td>We’ve started to work with CDP to join their Supply Chain Program and will be part of their program in 2022. In 2021, Arista developed and implemented new scorecards for key suppliers with new sections/scoring for ESG which ultimately help determine business awards.</td>
</tr>
<tr>
<td>Explore Science Based Greenhouse Gas Goals and Targets</td>
<td>ONGOING</td>
<td>Arista made progress in investigating the ability to develop science based corporate greenhouse gas goals and targets and is now working to implement goals and targets by 2023.</td>
</tr>
<tr>
<td>Apply Sustainability Principles to Post COVID-19 Work Practices</td>
<td>COMPLETE</td>
<td>In 2021, Arista implemented the use of reusable cleaning materials at our headquarters that resulted in the reduction of &gt;150,000 disposable wipes per year that would otherwise have ended up in a local landfill.</td>
</tr>
</tbody>
</table>
Our Goals for 2022–2023

For 2022, Arista has established the following goals:

**Accelerate DEI Success Through New Initiatives**
In 2022, Arista will initiate new relationships with non-profits and colleges and present and attend special events to increase our efforts to recruit greater numbers of women (with special focus on interns and early career hires) as well as members of underrepresented groups to Arista. We currently have a long-term goal of achieving 20% women in the employee base by 2030 or sooner.

**Supply Chain Alignment with CDP and Arista’s ESG Efforts**
In 2022, Arista aims to collect emissions data from its key suppliers through CDP Supply Chain Program. This will help in developing reduction targets.

**Align Arista’s Tree Planting Initiative with Carbon Neutrality Goals**
Arista will develop a plan to align our long standing commitment to the environment and reforestation to our future carbon neutrality goals.

**Create Science Based Greenhouse Gas Goals and Targets**
Arista will work with the Science Based Targets Initiative (SBTI) to develop science based corporate greenhouse gas goals and targets by 2023.
### GRI Content Index

This table is a snapshot of Arista’s 2020 CR Report GRI Content Index material ESG topics, mapped to the Global Reporting Initiative’s Sustainability Reporting Standards and Disclosures. These topics and Arista’s approach are addressed in this Corporate Responsibility Report and our company webpages. Our topic-specific standard disclosures report on the material ESG topics identified through our materiality assessment.

The following table presents these material topics, the specific considerations within that topic that are relevant to Arista, and whether the topic is relevant inside and/or outside of Arista.

<tr>
<td>GRI-303-2</td>
<td>Management of water discharge-related impacts</td>
<td>Not applicable. Arista does not own or manage any manufacturing facilities for which this indicator would be relevant.</td>
</tr>
</tbody>
</table>

Arista recognizes that several stakeholders have communicated an interest in this topic. As we do not own or manage any manufacturing facilities and our operational water requirements are minimal, we believe this indicator is not material to our business. We include this topic in this Content Index to facilitate transparency with interested stakeholders.
## GRI Specific Standard Disclosures - Environment

### EMISSIONS

<td>Non-compliance with environmental laws and regulations</td>
<td>Environmental Performance</td>
</tr>
</tbody>
</table>

No fines or sanctions have been levied against Arista for non-compliance re: environmental laws and/or regulations. Non-compliance issues have not been identified.

Arista considers the DJSI threshold of $10K threshold for environmental fines/penalties. Arista have not levied any fines or sanctions falling above this threshold.

Arista also uses C2P (a Compliance Management tool) to check if we will be affected by new or updates to existing laws and regulations. We have an annual subscription for this tool and check for updates on a daily basis.

### SASB Index

This table contains and refers to information related to the Sustainability Accounting Standards Board (SASB) for the Hardware sector.

This is the first year we are reporting our SASB metrics. We will continue to maintain our progress and report on the specific topic areas in our future reports.
