APPENDIX A

ARISTA PROBLEM PRIORITIZATION AND ESCALATION GUIDELINE

To ensure that all problems are reported in a standard format, Arista has established the following problem priority definitions. These definitions will assist Arista in allocating the appropriate resources to resolve problems. Customer must assign a priority to all problems submitted to Arista.

PROBLEM PRIORITY DEFINITIONS:

Priority 1: (Critical Customer Impact). Customer's mission-critical network functionality is inoperable, or has degraded to the point that normal operations are impossible. Arista and Customer will commit full-time resources to resolve the situation.

Priority 2: (Significant Customer Impact). The network is in an impaired state, and operating at a level of decreased effectiveness. Normal operations are possible, but negatively impacted. Arista and Customer will commit full-time resources during Standard Business Hours to resolve the situation.

Priority 3: (Acceptable Customer Impact). Normal operations of the network are not impaired, but a performance issue exists that requires attention. Arista and Customer are willing to commit resources during Standard Business Hours to restore service to satisfactory levels.

Priority 4: (Administrative Customer Impact). The issue is cosmetic, or an inquiry regarding switch operations. There is clearly little or no impact to the Customer's business operation. Arista and Customer are willing to provide resources during Standard Business Hours to provide information or assistance as requested.

Arista encourages Customer to reference this guide when Customer-initiated escalation is required. If Customer does not feel that adequate forward progress, or the quality of Arista service is not satisfactory, Arista encourages Customer to escalate the problem ownership to the appropriate level of Arista management by asking for the TAC Manager.
