TÜV SÜD America Inc. (TÜV SÜD) conducted the verification of the Arista Networks, Inc. FY 2025 GHG inventory according to the requirements found in ISO 14064-3:2019, 14065:2020, & 17029:2019. The objective of this verification was to ensure that the GHG statement is materially correct and conforms to all relevant criteria. The GHG statement is the responsibility of the Arista. A summary of the GHG statement is as follows:

- GHG-related activity: Scope 1, 2, and 3 emissions from 23 Arista Networks, Inc. facilities located worldwide
- GHG statement: FY 2025
- Criteria:
 - CDP Climate Change 2023 Reporting Guidance
 - The Greenhouse Gas Protocol (GHG Protocol): Corporate Accounting and Reporting Standard, World Resources Institute and World Business Council for Sustainable Development, March 2004
 - GHG Protocol Scope 2 Guidance
 - Technical Guidance for Calculating Scope 3 emissions (2013)
 - ISO 14064-3:20019 “Greenhouse gases – Part 3: Specification with guidance for the validation and verification of greenhouse gas statements”
 - Applicable SBTi guidance such as SBT “Transport Science-Based Target Setting Guidance”

The data and information supporting the GHG statement were historical in nature.

Based on the examination of the evidence, nothing comes to TÜV SÜD’s attention which gives cause to believe that the GHG statement is not a fair representation of GHG data and information.

TÜV SÜD has verified Arista’s inventory to a limited level of assurance, and confirms that there is no evidence that the GHG statement:

TÜV SÜD America Inc.
750 Main Street #200
Grand Junction, CO 81501

- Is not materially correct and
- Has not been prepared in accordance with all applicable criteria.

The verified GHG statement is summarized below.
