Arista Networks announces the end of sale for the 7300X Series System Bundles containing the 3000W AC front to rear airflow power supplies along with the 3000W AC front-to-rear power supplies. A higher efficiency 3000W AC power supply is available and is included in a set of System bundles. The rear-to-front system bundles are not affected by this end of sales notice. The system bundles and the power supply covered by this announcement are listed below in Table 1. The last day to order the affected products is August 25, 2018.

Customers with active support contracts for 7300X Series systems with the 3000W AC forward power supplies installed will continue to receive support from Arista TAC (Technical Assistance Center) as long as the 7300X Series systems remain covered under a support contract.

Migration Options

Customers should migrate to 7300X Series Bundles with the 3kW Titanium AC front to rear airflow power supplies, which deliver higher output power and are more efficient. The 3kW Titanium rated AC power supplies have been available since August 2016 and provide equivalent power with support in all current versions of EOS.
