Common Weakness Enumeration: CWE-121: Stack-based Buffer Overflow
This vulnerability is being tracked by BUG 1846909

Description

On affected Arista Wi-Fi access points, a memory corruption vulnerability exists in access point's wired uplink network endpoints. An unauthenticated attacker can crash the sensor service or potentially achieve remote code execution. Exploitation requires the attacker to be on the same network segment as the access point's wired uplink.

This issue was discovered internally by Arista, and the company is not aware of any malicious exploitation of this vulnerability in customer networks.

Vulnerability Assessment

Platform and Software Applicability Note

To determine actual exposure, operators should first check their software versions against the "Affected Software" list below. If your software release is not listed, your deployment is not vulnerable, regardless of the hardware platform in use.

Affected Software

Wi-Fi Access Point

- 22.0.1F-32 and below releases in the 22.x train
- 21.3.0M-13 and below releases in 21.x train
- All prior releases

Affected Platforms

The following products **are** affected by these vulnerabilities:

- WI-FI Access Points

Required Configuration for Exploitation

No specific configuration is required beyond default operation. However, exploitation requires the attacker to have access to the access point's wired uplink network.

Indicators of Compromise

No indicators of compromise are available for this issue.

Mitigation

There is no mitigation or workaround available.

Resolution

The recommended resolution is to upgrade to a remediated software version at your earliest convenience. Arista recommends customers move to the latest version of each release that contains all the fixes listed below. For more information about upgrading see Schedule Access Point Update.

CVE-2026-102167 has been fixed in the following releases:

- 22.1.1F-61 and later release in the 22.x train
- 21.4.0M-12 and later releases in the 21.x train

Hotfix

No hotfix is available for this issue.
