Arista Networks announces the deprecation of V7 and lower versions of its Wireless Manager APIs (Application Programming Interfaces) effective 1st September 2021. Customers using V7 or lower version APIs will continue to receive support from Arista TAC (Technical Assistance Center) until 31st August 2022.

Note: This announcement applies only to the Wireless Manager APIs, and not to the APIs for other services.

Migration

Customers are encouraged to migrate to V8 of the Wireless Manager APIs. The new APIs scale better with the growing Arista Wi-Fi product, and are easier to use and maintain.

- For documentation on the V8 Wireless Manager APIs, please visit https://apihelp.wifi.arista.com/home
- For more information on how to migrate to the V8 APIs, please visit https://apihelp.wifi.arista.com/migrate#.
- For more information on the Arista API Policy, please visit https://apihelp.wifi.arista.com/policy#.

If you need further assistance with migration, please contact support-wifi@arista.com.
