

Date: September 9th, 2020

Version: 1.0

Revision	Date	Changes
1.0	September 9th, 2020	Initial Release

The CVE-ID tracking this issue is: CVE-2020-24333

CVSSv3.1 Base Score: 6.5 (CVSS:3.1/AV:A/AC:L/PR:N/UI:N/S:U/C:N/I:N/A:H)

Description

This advisory documents the impact of a vulnerability in Arista's CloudVision Portal (CVP). The effect of this vulnerability is that users with "read-only" or greater access rights to the Configlet Management module can download files not intended for access, located on the CVP server, by accessing a specific API. This API can only be accessed by authenticated users.

The access rights of a given user are based on the user's assigned role. "network-operators" have "read-only" access rights to all modules (including Configlet Management) and any user with a network-operator role is therefore affected. The "network-admins" role is affected as well due to its access rights to all modules. If a custom role has been configured, the associated access rights can be viewed by opening the /cv/settings/aaa-roles URL on the CVP Web GUI.

Example:

The following steps detail how the access rights for a user "test_user" with role "Test Role" can be viewed from the CVP Web GUI:

1) Check the assigned role(s) for a given user from /cv/settings/aaa-users:

User	First Name	Last Name	Email	Authentication Type	Roles	User Status	Current Status
test_user	Filter	Filter	Filter	Filter	Filter	Filter	Filter
test_user			test_user@domain.com	Local	Test Role	Enabled	Offline

2) View the access rights of the concerned role from /cv/settings/aaa-roles:

ARISTA

Name*:		Description (optional):		
Test Role		Test User Role		
Module Access				
Inventory		Settings		
Inventory Management	Read Only	✓ AAA Settings	Read Only \lor	
vEOS Router Management	Read Only	Account Management	Read Only \vee	
Provisioning		Audit Logs	Read Only \vee	
Change Control Approval	Read Only	Cluster Management	Read Only V	
Change Control Management	Read Only	Licensing	Read Only V	
Configlet Management	Read Only	SSL	Read Only V	
Image Management	Read Only	✓ Events		
Network Provisioning	Read Only	V Event Acknowledgment	Read Only \vee	
Public Cloud Accounts	Read Only	✓ Event Configuration	Read Only \vee	
Snapshot	Read Only	V Event Notification	Read Only \vee	
Tag Management	Read Only	Telemetry		
Task Management	Read Only	Bug Alerts Management	Read Only \lor	
Workflow	Read Only	Metric Dashboards	Read Only \vee	
Zero Touch Provisioning	Read Only	Multi-switch Tap Aggregation	Read Only \vee	

This vulnerability was discovered internally and there has been no report of exploitation in the field.

CloudVision Portal

All releases prior to 2020.2

Affected Platforms

- This vulnerability affects CloudVision virtual and physical appliances running with the versions identified above.
- The following products are **not affected:**
 - CloudVision as-a-Service
 - EOS running on Arista switching platforms
 - CloudEOS VM / vEOS Router
 - Arista Wireless Access Points
 - Arista 7130 Systems running MOS
 - Big Switch Nodes for BCF and BMF (Arista CCF and DMF)

Mitigation

For custom roles, access to the Configlet Management Module can be disabled by navigating to **Settings/Access Controls/Roles/Role_name** on the CVP Web GUI and selecting "No Access" as indicated below:

	Description (optional):		
	Test User Role		
	Settings		
Read Only	AAA Settings	Read Only V	
Read Only	Account Management	Read Only \vee	
	Audit Logs	Read Only V	
Read Only	Cluster Management	Read Only V	
Read Only	Licensing	Read Only V	
No Access	SSL	Read Only V	
Read Only	Events		
Read Only	Event Acknowledgment	Read Only \vee	
Read Only	Event Configuration	Read Only \vee	
Read Only	Event Notification	Read Only V	
Read Only	Telemetry		
Read Only	Bug Alerts Management	Read Only \vee	
Read Only	Metric Dashboards	Read Only \vee	
Read Only	Multi-switch Tap Aggregation	Read Only \vee	
	Read Only Read Only Read Only No Access Read Only Read Only	Test User Role Read Only AAA Settings Read Only Account Management Audit Logs Read Only Cluster Management Licensing No Access SSL Read Only No Access SSL Read Only Events Read Only Event Acknowledgment Read Only Event Acknowledgment Read Only Event Notification Read Only Event Notification Read Only Event Notification Read Only Bug Alerts Management Read Only Wulti-switch Tap Aggregation	

Please note that module access cannot be disabled for default roles "network-operator" and "network-admin". The above mitigation step applies to custom roles alone. For the resolution, please refer to the next section which lists the details of the remediated software versions.

Resolution

This vulnerability is being tracked by Bug 502053 and has been addressed in the 2020.1.2, 2020.2.0 and later versions of CloudVision Portal. The recommended resolution is to upgrade to a version of CloudVision Portal with the fix included.
